8. Jupiter: <https://developers.jup.ag/docs/get-started>

tips

1. ask clarifying questions about the spec so you get it right
2. power the app with real data, pull to refresh **MUST** work
3. test trading with devnet. once devnet works, switch to mainnet.
4. all services have free tier

deadline

by the end of next weekend June 28

ask for extension upfront if your time is constrained

once you are done. please share the live preview. i'll review and get back to you.
